DETAILED ACTION***Allowability Withdrawn***

1. The indicated allowability of claim 10 is withdrawn in view of further consideration of reference(s) to Janssen et al (6461709). Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 10 is rejected under 35 U.S.C. 102(e) as being anticipated by Janssen et al. (6461709).

Janssen discloses, as in claim 10, an optical stack (see fig. 1) comprising a plurality of superposed removable lenses (16 and 18) adhesively (20) affixed to one another; each said removable lens being held to each successive lens with a clear uninterrupted adhesive layer interposed between each said removable lens (col. 14, lines 37-51);

each said lens having a removable tab portion (21) on at least one end which does not have any adhesive layer on either side of said tab portion such that when the optical stack of laminated removable lenses and expose a clean lens directly underneath said removed top lens (see figure 7; col. 14, lines 55-60).

Allowable Subject Matter

4. Claim 11 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is an examiner's statement of reasons for allowability: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in claim(s) 11, wherein the claimed invention comprises a second removable tab portion opposite the end of said removable tab portion (of claim 10), as claimed. The combination of all the claimed features are not anticipated or made obvious by the prior art and all of said claimed features are relied upon for a determination of allowability.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Woods (5592698) is cited for disclosing a tear off lens for transparent eye and face shield, but unlike the present invention, Woods does not disclose an adhesive layer or a second removable tab portion opposite the end of a removable tab portion, as claimed.
